#### Program Summary

*The background and current situation*

Botswana is classified as an upper middle-income country with its per capita GNI US$7,660 (World Bank, 2019). However, its economy relies heavily on the mining sector and there is a pressing need for industrial diversification. In order to diversify its economy, certain challenges need to be addressed such as building basic economic infrastructure, particularly in the areas of transportation, information and communication, as well as capacity building of related government institutions.

*Strategy*

Towards sustainable economic growth, Japan supports the steady implementation of on-going infrastructure projects, such as the construction of a One Stop Border Post (OSBP) at Kazungula Bridge and the nationwide roll-out of digital broadcasting.

#### Program for strengthening Transportation, Information and Communications Infrastructure

**Japan’s Assistance Program**

- Kazungula Bridge Construction Project
- Joint Seminar of JICA-WCO Collaboration on Trade Facilitation in Southern/Western Africa
- The Project for capacity development for OSBP operation on the North-South transport corridor
- Nation-wide Implementation of Digital Migration – Analog Switch-Off Strategy
- The Economic and Social Development Programme
- Nation-wide Implementation of Digital Migration – Analog Switch-Off Strategy
- Training in Terrestrial Digital Television Broadcasting sector

#### Project Management

- Project Management for Mega Project Implementation
- Human Resources Development in the Mining Sector (KIZUNA Program)
- SDGs Global Leadership Program
- African Business Education Initiative
- Training in Governance and Private Sector Development Sector
- JOCV in Governance and Private Sector Development Sector

#### Note

- As of April 2020

---

### Program for Human Resource Development in Private and Public Sector

**Priority Area 1**

1-2

**Support for Human Resource Development toward Industrial Diversification**

**Program Summary**

- In addition to supporting the development of human resources in the private sector, the programme also supports optimization of public investment, food security and public services for environmental management, as well as institutional capacity development for policy implementation and management, hence seeking an industrially diversified economy that does not rely excessively on the export of mineral resources.

#### Project Management

- Project Management for Mega Project Implementation
- Human Resources Development in the Mining Sector (KIZUNA Program)
- SDGs Global Leadership Program
- African Business Education Initiative
- Training in Governance and Private Sector Development Sector
- JOCV in Governance and Private Sector Development Sector

#### Note

- As of April 2020
## Poverty Reduction and Betterment of Quality of Life

### Priority Area 2

#### Background and current situation

Although the Government of Botswana places importance on public investment in health and education sectors, Botswana faces challenges in such area as improving quality of education and quality of life, enhancing health care system including response to the high rate of HIV/AIDS morbidity, and sustainable resource management. In addition, economic disparities due to rapid economic growth and geographical factors have not been resolved, and problems such as high unemployment and income disparities still exist.

#### Strategy

In order to redress economic disparities and reduce poverty, Japan supports community development such as livelihood improvement, sustainable resource management and improvement of educational environment. Japan also provides support to further improve the quality of life in the community through empowerment of vulnerable people and promotion of culture and sports, through Japan Overseas Cooperation Volunteers (JOCVs) scheme and various training programmes.

### Japan's Assistance Program

#### Program Summary

The programme assists to improve basic social services and quality of life by improving the enabling environment and human resource development for vulnerable communities in the fields of livelihood improvement, education, social welfare, public health, and the promotion of culture and sports.

1. **GDP in improvement of Social life for poverty community**
2. **EGA in Accelerating the Elimination of Neglected Tropical Diseases in Botswana**
3. **Training in Local Industry Development through OVOP Movement (Kenya)**
4. **Training in Local Industry Development and Rural Development Sector**
5. **JOCV in Local Industry Development and Rural Development Sector**
6. **Emergency response to improving food and nutrition security caused by poor rains and Fall armyworm in Botswana**
7. **Training in Food and Nutrition Sector**
8. **JOCV in Improvement of Sports Sector**

#### Program for Improvement of Standard of Living for Poor Community

Japan supports Botswana by promoting the sustainable use of natural resources and livelihood improvement activities of local residents, and contributes to the creation of a society in which the ecosystem and human activities are in harmony.

1. **Project for Conservation and Sustainable Management of Forest Resources in Southern Africa**
2. **Data Collection Survey against Forest Fires on Amazon Basin and Southern African Areas**
3. **Training in Integrated Biodiversity and Ecosystem Conservation (Malaysia)**
4. **Project for Capacity Development for the Conservation and Sustainable Use of Forest and Range Resource through the Process of Master Plan Development**
5. **Training in the Mineral Resources Management**

#### Program for Sustainable Resource Management

The programme assists to improve basic social services and quality of life by improving the enabling environment and human resource development for vulnerable communities in the fields of livelihood improvement, education, social welfare, public health, and the promotion of culture and sports.
